Subject: INFORMATION: Local and Rural Road Safety Resources Webinar Series; 10/5/2011; 10/12/2011;11/9/2011

Good Afternoon,

Please join us for a 3-part webinar Series on Local and Rural Road Safety Resources on **October 5th, October 12th and November 9th**. Each webinar will be 1 ½ hour duration and participants will have the opportunity at the end of the formal presentations to discuss practices presented.

FHWA has developed a series of manuals to help practitioners effectively identify and address local rural safety issues related to roadway departure, intersections, and information analysis. Although the manuals are geared toward local and rural road managers and other practitioners with responsibility for operating and maintaining rural roads, practitioners and stakeholders at all level can benefit. It offers information on the procedures and processes to improve the safety of local rural roads and to reduce the potential for future crashes.

Each of the series' three webinars will include an overview of the manual and a real-world case study from a local rural safety practitioner. More information about these topics and respective presenters is available in the attached flyer.

A separate registration is required for each webinar.

Roadway Departure Safety

Wednesday, October 5, 1:00-2:30pm ET

To register, [CLICK HERE](#). If clicking doesn't work, copy this link in your web browser:
